Directions: Use the questions below to start planning your song.

What is the main idea or message? Are you trying to teach the reader something, compelling them to change their behavior, or both?

How will you structure your song? How many verses will your song have and what will each verse be about? What will you include in the chorus to get the main message across?

What lyrics will you use? Are there certain words that you want to make sure to include? Will you use rhyme, repetition or patterns to make your song sound nice?
